KITKAT 4.4.2	
Micromax Q371 comes with KITKAT 4.4.2 that is capable of performing various functions just like your personal computer and can be personalized according to your own needs. For example, you can add and remove applications or upgrade existing applications to improve the functions. At the Google Play Store, an ever-growing range of applications, games, movies, and books are available for you to download.	
Read Me First	
Please read all safety precautions and this manual carefully before using your device to ensure safe and proper use.	
The descriptions in this manual are based on the default settings of your device.	
Available features and additional services may vary by device, software, or service provider.	
Applications and their functions may vary based on the country, region, software or hardware specifications. Micromax is not liable for performance issues caused by third-party applications.	
Disclaimer	
The colors, specifications, functions and graphics shown/mentioned in the user manual may differ from the actual product. In such a case, the latter shall govern. Images shown are for representation purpose only. Specifications are subject to change without prior notice. Micromax keeps the right to modify the content in this user guide without prior notice.	
Upon first use of your device, your device will send information related to your mobile, IMEI numbers, location details and other software details through SMS* automatically. This information may be used as further specified in Micromax privacy policy**.	
Talk and standby times are affected by network preferences, type of SIM cards, connected accessories and individual usage patterns. Services and some features may be dependent on the network, service/content providers, SIM cards, compatibility of the devices used

Power On/Off	
Getting Started	
SIM and Memory Card Insertion	
Your Q371 is a dual SIM phone with expandable memory. Switch off your phone before SIM/memory card insertion/removal and insert the card(s) in the slots correctly.	
Switch off your phone and remove the rear cover.	
Please keep the SIM Card out of the reach of children.	
The card and the contacts are vulnerable to damage due to scratching or bending. Therefore, be careful when using, inserting or removing the cards.	
Use only compatible memory cards with this device. Incompatible memory cards may damage the card or the device and corrupt the data stored in the card.

Handset Keys	
Power Key	
Wake up the Screen: Firmly press the Power key to wake up the screen or to turn off the screen.	
Turn Off: Wake up the screen first. Now, long press the Power key then tap "Power off" to turn off the phone.	
Quick Options: Wake up the screen first. Now, press the Power key for 2 seconds to view quick options to turn off the phone, reboot, switch to airplane mode, or adjust the sound profiles.	
Volume Keys	
Adjust the in-call, media, and ringtone volume from the volume keys available on the right side of the device.	

www.micromaxinfo.com

Handset Keys	
Navigation Keys	
Menu Key	
Opens a menu with items that affect the current screen or application.	
While you are on the home screen, tap to view quick access options.	
Long tap to open the most recently used applications.	
Home Key	
Opens the Home screen. If you are viewing any of the extended Home screens, opens the central Home screen.	
Long tap to open Google Now.	
Back Key	
Takes you to the previously opened screen until the Home screen appears.	
If the onscreen keyboard is open, closes the keyboard.	

www.micromaxinfo.com

Charge the Battery	
Before using the device for the first time, we recommend you to use the power adapter to charge the battery for at least 1-2 hours.	
Connect the power adapter to the power outlet and the USB cable, as illustrated in the following image:	
When turned on, the battery level and charging status gets displayed in the upper-right corner of the screen.	
Use only Micromax chargers and cables. Other chargers or cables can cause the battery to explode or damage your device. This may invalidate your phone warranty.	

www.micromaxinfo.com

Home Screen	
You can personalize your home screen with shortcuts, widgets, and wallpapers. To view quick options to change wallpaper, add widgets, or open settings section, tap the F key. You can add extensions to the home screen by dragging an item to the right edge of the screen until a new screen appears. Your Q371 will show only those extended home screens that have some shortcut/widget placed on them. Swipe left or right on the home screen to view the next extended home screen.	
In the bottom pane, there will be five launcher icons for you to open different sections in the phone. Except the application launcher in the middle of the pane, you can rearrange and manage the other four icons. Tap and hold to select a launcher icon and then you can rearrange, change, or remove them with ease.	
Know More About Widgets... Widgets allow placing application shortcuts on your home screen. You can place analog clock, your recent call logs, and other such sections of your phone on the home page and access them directly! View all available widgets by tapping the F key and then tapping Widgets .	
Application Launcher Application launcher or Application menu is available right in the middle of the home screen bottom pane.	
Tap ⌵ to view all built and installed applications. In the application menu, tap and hold any application to take it to the home screen, release the hold to place at any desired location on the home screen.

Account Configuration	
Google Account	
Some applications and services of your smartphone may require you to sign in to your Gmail account. If you do not have an existing Gmail account, you can easily sign up and create a new account from the Gmail app in your phone.	
Configuring Gmail account will not only allow you to access your emails but will also enable you to sync your phone calendar and contacts with your Gmail account. Changing your handset and taking contact list backup cannot get easier. In addition to this, your Gmail account lets you take full advantage of applications and services offered by Google on your Android phone. Configure your Google account on this handset to get an ease-of-access and sync your preferences and data on some applications rendered by Google.	
Network connection is required for a successful Gmail account configuration.	
Other Accounts	
In addition to Gmail, you can configure other email accounts from:	
→ Add account	
Also, you can download desired email application from the Play Store and access emails from the respective application.	

www.micromaxinfo.com

Notifications	
Your phone has a notification LED which notifies you with missed calls, text messages, charging on/off, and various other notifications and events as and when they appear in the device.	
Clear All Notifications	
Open Notification Panel	
Close Notification Panel	
Open Toolkit Quick Access Panel	
When you receive a notification, its icon appears in the status bar, along with a brief summary. You may clear each notification separately by swiping it towards left or right.	
Toolkit provides you shortcuts to manage basic phone features, such as Airplane Mode, Wi-Fi, Display Brightness, and many more.	
Your phone has gravity sensor to detect gravity and display correct orientation based on the motion.	

www.micromaxinfo.com

Phone Security	
Unlock the Screen	
By default, Slide Unlock is your unlocking technique.	
To unlock:	
1. Wake up the screen by firmly pressing the Power key.	
2. Place your finger on the lock icon and drag it towards the unlock icon to unlock the screen.	
Protect your phone from unauthorized access. Once locked, the phone can be unlocked by providing the unlocking password set while choosing the unlocking technique.	
Phone Unlocking Methods	
Choose and set a screen unlocking technique from:	
→ Security → Screen lock	
It is important to remember the passwords and commands, which you set for your phone. A forgotten password cannot be retrieved.	
Slide Unlock	
Place your finger on the lock icon and drag towards the unlock icon.	

www.micromaxinfo.com

Face Unlock	
Set your face as the screen unlock password. The front-facing camera recognizes your face and unlocks the device.	
Face unlock feature may recognize photographs and thus may be less secure as compared to other unlock methods.	
Voice Unlock	
Set voice commands to unlock the phone. Also, you can set wake up commands to unlock and launch dialpad/messaging/camera directly.	
PIN	
Set a PIN of at least four digits as the password to unlock.	
Pattern	
Connect the dots to form a pattern and use the same to unlock.	
Password	
Set and use an alphanumeric password of at least 4 characters to unlock the phone.	

www.micromaxinfo.com

Google Search	
Search anything in your phone or in the outside world from Google Search. You can type your search keywords or can even speak it up as your search supports voice recognition also. Use voice commands to access various useful sections on your handset.	
Google Search is available on the Home screen and in the application menu too.	
Using the Touch Screen	
Tap and hold an item to view the list of actions based on the selected item and condition. Also, you can move an item from the Apps screen to the home screen using this method.	
Drag and Hold	
Tap and hold an item to view the list of actions based on the selected item and condition. Also, you can move an item from the Apps screen to the home screen using this method.	
Drag an Item	
Tap and hold an item and move your finger on the screen until you reach the target position. The item follows your finger.	

www.micromaxinfo.com

Scroll

To scroll a list, slide your finger across the surface of the screen upwards or downwards (without dragging an item).

Double-tap

Tap quickly twice on a webpage, map, or other screen to zoom. For example, double-tap a section of a webpage in the browser to zoom that section.

Swipe

Place a finger on the screen and steadily slide your finger in the desired direction.

Using the Onscreen Keyboard

Some applications display the keyboard by default. In others, you will be required to tap a text field, where you want to enter text, to open the keyboard.

Using the Pinch Zoom

You can open any image or web page and then use your thumb and index finger to zoom the display through the pinch gesture.

Double-tap

Tap quickly twice on a webpage, map, or other screen to zoom. For example, double-tap a section of a webpage in the browser to zoom that section.

Swipe

Place a finger on the screen and steadily slide your finger in the desired direction.

Using the Onscreen Keyboard

Some applications display the keyboard by default. In others, you will be required to tap a text field, where you want to enter text, to open the keyboard.

Using the Pinch Zoom

You can open any image or web page and then use your thumb and index finger to zoom the display through the pinch gesture.

Double-tap

Tap quickly twice on a webpage, map, or other screen to zoom. For example, double-tap a section of a webpage in the browser to zoom that section.

Swipe

Place a finger on the screen and steadily slide your finger in the desired direction.
